

Graduate Mechanical Design Engineer

Due to on-going investment and continuous business development, we currently have a vacancy for a Graduate Mechanical Design Engineer.

This is a newly developed position within our organisation. Providing a role for a Graduate Mechanical Design Engineer to support on a variety of projects.

Working within a knowledgeable team that will provide support where required, along with an excellent platform to develop the candidate's skills.

The Role:

- Support the engineering team on delivering varied projects, contributing to project management & review.
- Produce engineering drawings & review design in a multi-discipline environment.
- Maintain files & data, producing clear & well-presented reports where required.
- Competitive salary, along with progression & company performance related bonus.

The Person:

- Qualified or nearing completion in a relevant Mechanical Engineering Course to degree level.
- Competent in AutoCAD along with excellent IT skills.
- Excellent communication/organisational skills, problem solving & ability to work well within a team.
- Possess a full UK driving licence & willing to travel to sites across Scotland.

If you have the necessary skills and desire to become part of our team, we would like to hear from you. Please do not hesitate to contact us, should you require any further information regarding this position.

Please send CV with a covering letter to:-
